

OZ SOLAR ENERGY SOLUTION PTY LTD

- Together we can save planet
- Over 3M Australian homes have installed roof top solar

Join solar revolution with OZ Solar...!

- It is no secret that Australia enjoys some of the best solar resource-sunshine
- The Australian sun can power your roof and save you \$\$\$\$.
- Over 3M Australian homes already installed rooftop solar
- There is strong Solar revolution in Australia
- Australia has become world leader in distributed renewable energy
- Opportunity for Australians to take control of their energy bills, create jobs, tackle climate change and provide a cleaner, better future
- Say good bye to energy bill, protect from future price hike
- Save thousands of dollars
- Low maintenance
- Reduce your carbon footprint and help save the environment.
- Save carbon emissions-solar power alone can reduce approximately 8.5 tons of CO₂ per household per year which equates to taking 3 cars off the road

About OZ Solar

- Clean Energy Council of Australia Approved Retailer
- 100% privately owned Australian company into solar for more than a decade
- Aim to help Australian community save money, save planet and improve quality of life
- Australian Solar Council 'Positive Quality' Panels.
- Code of Conduct.
- High Level of Expertise

- Highly experienced Solar advisors
- Team of highly experienced Solar Energy Engineer, Project Managers
- CEC Accredited solar designers
- Accredited qualified certified in house Installers
- Background Research
- Warranty Support

We aim to help Australian community save money, save planet and improve quality of life. We wish our customers to take well informed decision about solar and as an initiative offer

Free Consulting Session

Rebates and New Plan

We organize all eligible rebates for our customers:

Fed Govt Rebate of **30%**

+

Vic Govt extra Rebate of **50%** up to **\$1400**

+

Vic Govt **Interest Free** Loan

AND

\$0 Out of Pocket Plan

Battery and Battery Rebate

Batteries are an energy storage technology that uses chemicals to absorb and release energy on demand. Lithium-ion is the most common battery chemistry used to store electricity.

Coupling batteries with renewable energy generation allows that energy to be stored during times of low demand and released (or dispatched) at times of peak demand.

Battery is the brightest development for the future of renewable energy and the use of batteries for renewable energy is expected to increase many fold over the coming years.

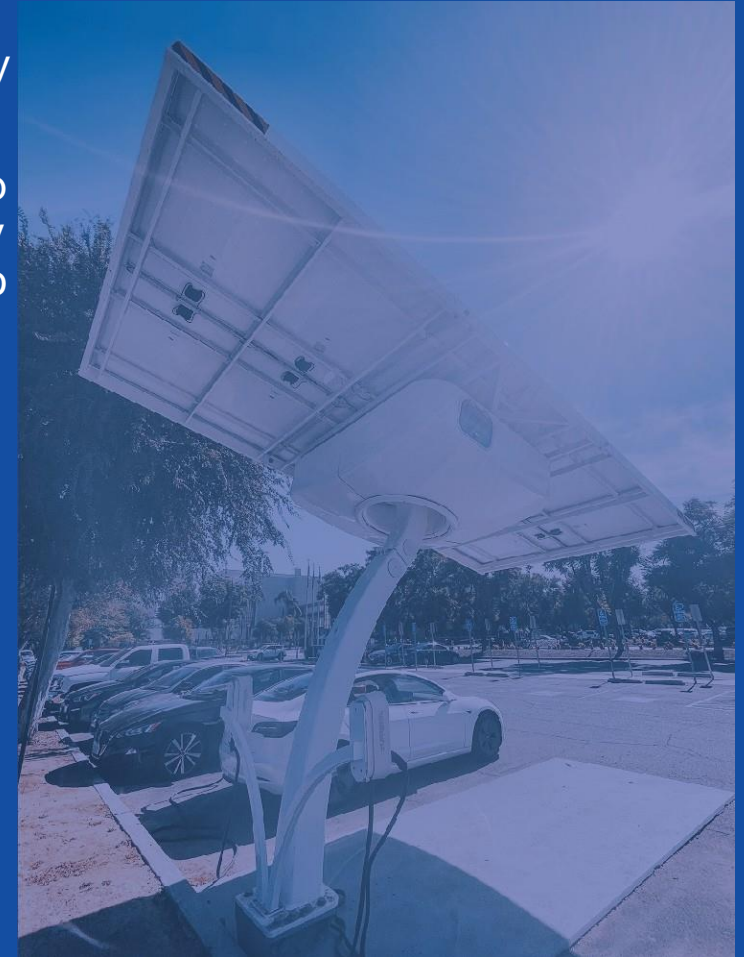

Solar Victoria is supporting eligible Victorian households to install a solar battery, by providing a point of sale discount up to a maximum of \$3,500.

OZ Solar offering world's innovative technology Virtual Power Plant

As an established, credible and responsible energy company, we continuously strive to offer best solar options to our customers.

We are happy to offer Virtual Power Plant, innovative technology in partnership with Discover Energy Pty Ltd, Australia. DE is an Australian local energy company, providing comprehensive electricity and gas retail services to customers. With DE and OZ Solar, our customers can

- Utilize the idle roof space to generate your own green energy through solar power plant.
- Utilize your own green energy for your house instead of buying from the grid.
- Store excess energy in battery and draw this power when needed.
- If there is still any unused power, earn the huge FIT of upto 20cents per kwh instead of meagre 6 cents.
- Also make money out of it by selling excess energy at higher rate and buy energy at lower rate or Free. This is not a typo. This is Smart energy trading. DE charges your battery for free at appropriate times

Features of Virtual Power Plant and Smart energy trading:

1. Your Solar powered home becomes a VPP (Virtual Power Plant) with eligible battery and inverter Combination.
2. Your solar system charges the solar battery which stores energy and powers your home 24hrs a day. The Inverter is connected to DE Specialised software.
3. The revolutionary cloud based software monitors your inverter and the Grids energy demand. At the optimum moment the software sells your excess power back to the Grid maximising your energy income.
4. DE has built up fantastic mobile app that helps you to understand in real time how much energy you are using, how much it is costing and it even helps figure up what specific appliances are costing you using the real time feature. Using The DE Insights mobile app you can easily track the trades and your income statements from the comfort of your phone.
5. Have full control of your solar and battery resources with a strong focus on renewable power, and be more efficient towards reducing your carbon footprint.

Thanks for your valuable time.
